

Swing Trading Stocks and Options with Tradytics

A comprehensive guide on how to use
Tradytics to swing trade stocks

What is Tradytics

We are an **Artificial Intelligence Driven** trading platform that develops a wide variety of tools to help you get an edge in the market.

Where is the edge?

We analyze **over a million data points** every day from options flow, intraday stocks data, news, insiders trades, and more.

Based on this analysis, our proprietary AI algorithms extract useful information that helps us gauge market directions well before time.

swing trading

Daily Data Intraday Data S/R Lines Entry Exits

For swing trading, always draw out the **support resistance lines** on daily chart

Part 2: *How* to trade?

Scany Example # 1: Breakout Filter

Important buttons for
swing trading

Daily Data Intraday Data S/R Lines Entry Exits

The next resistance line

Exact Price of SR
Line

For swing trading, always draw out the **support resistance lines** on daily chart

Part 2: *How* to trade?

Scany Example # 1: Breakout Filter

Tip on trading with **Support and Resistance** lines

1. Always buy at support and sell at resistance
2. However, if price breaks out of resistance, get in again with a stop loss **one ATR** below the resistance level
3. Similarly, when buying at support, set up the stop loss **one ATR** below the support level.
4. If the next SR level is close to the current level, you can also set up your stop loss there

Part 2: *How* to trade?

Scany Example # 1: Breakout Filter

Part 1: *What* to trade?

What if I do not want to do my own due diligence and just use the power of your AI toolkits? Is there something for me?

Chat with us

Synthetic VIX is a premium scanner. If you don't understand a scanner, please google it to read more about it.

Part 2: *How* to trade?

Scany Example # 3: Synthetic VIX

Synthetic VIX setups usually give you **great entry points for long setups**. It is better that a stock is in an uptrend already for this scanner to work well.

Part 2: *How* to trade?

Scany Example # 3: Synthetic VIX

You can always combine your research with our entry exit recommendation engine

Part 1: ***What*** to trade?

Tradytics AI Tools

We have 2 AI tools that predict weekly stock movement

www.tradytics.com/options-psyhic

www.tradytics.com/stock-prophet

Alerts from these tools are valid for a maximum of **five days**. The tools **only predict** whether the price of the stock will go up or down. They ***do not predict direct entries and exits***. You need to use other methods as described in prior slides to get good entries and exits.

TRADYTICS
AI Driven Trading

Part 1: *What* to trade?

Why 2 different tools?

Stock Prophet

AI uses price action, technical indicators, and volume to make predictions.

Options Psychic

AI uses options flow to make predictions.

Same task to predict (price movement), **different inputs**. It's better if both tools have the same opinion about a stock

Alerts from these tools are valid for a maximum of **five days**. The tools **only predict** whether the price of the stock will go up or down. They **do not predict direct entries and exits**. You need to use other methods as described in prior slides to get good entries and exits.

Part 1: *What* to trade? (Stocks & Options)

Options Psychic

AI based options flow analyzer for weekly directional predictions of stocks.
